

BUILDING ENVELOPE WORKSHOP

**PRACTICAL BUILDING SCIENCE.
REAL-WORLD INSTALLATION.**

This three-hour hands-on workshop covers essential building science and practical installation techniques to help you avoid common installation errors and costly rework.

Work directly with pro clima systems and learn best-practice methods you can immediately apply or specify.

Learning Objectives

- Building science principles for moisture control.
- Best-practice specification and installation of weathertightness and airtightness systems, including retrofit solutions.
- Improved window installation techniques.
- Practical skills you can put into action.
