

### Safety Data Sheet

#### 1. Identification of the substance/mixture and of the company/undertaking

##### Trade name

##### AEROSANA VISCONN

- Relevant identified uses of the substance or mixture and uses advised against
- Use advised against:
- Manufacturer/Supplier

Mixture.

No information available.

##### Australia:

15-21 Doody St Alexandria, Sydney, 2015  
PO Box 924, Gosford, NSW 2250

### 5. Firefighting measures

#### Extinguishing media

- Suitable extinguishing agents

#### Specific hazards Arising from the Chemical

- Hazardous combustion products
- Flammability

#### Advice for firefighters

- Special protective equipment for firefighters
- In case of fire

Water fog, alcohol-resistant foam, dry chemical or carbon dioxide. Do not use full water jet.

Oxides of carbon and nitrogen.

Not flammable, but may burn or decompose in a fire.

When fighting a major fire wear self-contained breathing apparatus and protective equipment.

Containers close to fire should be removed if safe to do so. Use water spray to cool fire exposed containers.

### 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

- Personal protection equipment
- Environmental precautions
- Methods and material for containment and cleaning up

Wear approved respiratory protection, chemical resistant gloves, protective clothing and safety boots. Evacuate all non-essential personnel from affected area. Do not breathe vapours. Ensure adequate ventilation.

In the event of a major spill, prevent spillage from entering drains or water courses.

Stop leak if safe to do so and absorb spill with sand, earth, vermiculite or some other absorbent material. Collect the spilled material and place into a suitable container for disposal.

### 7. Handling and storage

#### Precautions for safe handling

- Advice on safe handling

Use of safe work practices are recommended to avoid eye or skin contact and inhalation of vapours. Use only outdoors or in a well-ventilated area.

Food, beverages and tobacco products should not be stored or consumed where this material is in use.

Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use.

Provide eyewash fountains and safety showers in close proximity to points of potential exposure.

Wear personal protection equipment (refer to section 8). Keep container tightly closed.

#### Conditions for safe storage, including any incompatibilities

- Requirements for storage rooms and vessels

Store in a cool, dry and well ventilated area. Keep container tightly closed when not in use. Protect from extreme temperatures. Store at 5 - 25 °C. Keep away from strong oxidising agents.

### 8. Exposure controls/personal protection

#### Exposure controls

- Exposure Standards
- Engineering Controls
- Respiratory Protection

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

Ensure adequate ventilation of the working area.

Use an approved ABEK P2 respirator under conditions where exposure to the substance is apparent (e.g. generation of high concentrations of mist or vapour, inadequate ventilation, development of respiratory tract irritation) and engineering controls are not feasible. See Australian Standards AS/NZS 1715 and 1716 for more information.

## Sprayable Intelligent Air Barrier

- Skin Protection

Nitrile, butyl rubber and chloroprene gloves. See Australian/New Zealand Standard AS/NZS 2161 for more information. When selecting gloves for use against certain chemicals, the degradation resistance, permeation rate and permeation breakthrough time should be considered.

Occupational protective clothing (depending on conditions in which it has to be used, in particular as regards the period for which it is worn, which shall be determined on the basis of the seriousness of the risk, the frequency of exposure to the risk, the characteristics of the workstation of each worker and the performance of the protective clothing). See Australian/New Zealand Standard AS/NZS 4501 for more information.

- Eye and Face Protection:

Eye and face protectors for protection against splashing materials or liquids. See Australian/New Zealand Standard AS/NZS 1337 for more information.

### 9. Physical and chemical properties

#### Information on basic physical and chemical properties

##### Appearance

- Form
- Colour
- Odour

Liquid.  
Blue (wet), Black (dry)  
Characteristic.

- Odour Threshold
- pH-value

No information available.  
No information available.

##### Change in physical state

- Melting point/freezing point
- Initial boiling point/Boiling range
- Flash point
- Flammability
- Auto-ignition temperature
- Decomposition temperature
- Explosion Limits
  - Lower
  - Upper
- Vapour pressure
- Relative Density
