## Roof Weather Resistive Barrier

SOLITEX MENTO® 3000 provides superior weather and condensation protection for your roof, under all weather conditions. With type R4 classification (NZS 2295), it is suitable to be used in self-supported applications up to and including extra high wind zones. SOLITEX MENTO® 3000 protects your roof and building envelope from the elements during construction, whilst allowing any internal moisture to escape through the vapour permeable, non-porous TEEE<sup>+</sup> layer.

SOLITEX MENTO® 3000 connect makes use of **connect** technology and comes with two integrated self-adhesive strips for ease of installation.

### IMPORTANT INFORMATION

- This product is a Class 4 vapour permeable pliable building underlay in accordance with AS 4200.1.
- This product is designed to withstand up to 90 days UV exposure before cladding is installed.
- This product can withstand temperatures up to 120°C and down to -40°C behind external claddings.
- For ease of installation SOLITEX MENTO® 3000 connect is available with two integrated self-adhesive strips.

### PRODUCT DESCRIPTION

SOLITEX MENTO® 3000 is a UV stabilised and tear resistant synthetic weather resistive barrier (WRB) for roofs. A non-porous water resistant TEEE<sup>†</sup> film is laminated at high temperature between two layers of spun bonded polypropylene (PP). SOLITEX MENTO® 3000 connect comes with two integrated self-adhesive strips.

### WEATHER EXPOSURE

This product is a weather resistive barrier (WRB) and designed to withstand up to 90 days direct exposure to UV and still fulfil the intended use for wind and water control. Exterior cladding should be detailed to prevent direct sunlight onto the membrane in service.

### APPLICATION NOTES

This product is suitable for use in accordance with BRANZ appraisal 855 as an alternative to conventional kraft paper roof underlays or in accordance with approved pro clima installation method utilising counter battens and above underlay ventilation. SOLITEX MENTO® 3000 connect is recommended for optimum weather proof joints on roof pitches below 15 degrees.
