Building Product Information Sheet

Product name (include	the brand name):							
pro clima SOLITEX® ME	ENTO 1000							
Product description a	nd its intended use (measurements,	materials, usage):						
SOLITEX MENTO® 1000 is a monolithic, non-porous, synthetic building underlay for use under roof claddings. The product consists of a TEEE (Thermoplastic Elastomer Ether Ester) water-resistant film laminated between two layers of polypropylene microfibre cover fleece. SOLITEX MENTO® 1000 is coloured black on the top face and grey on the bottom face.								
SOLITEX MENTO® 1000 provides weather and condensation protection for your roof, under all weather conditions. With type R4 classification (NZS 2295), it is suitable to be used in self-supported applications up to and including extra high wind zones. SOLITEX MENTO® 1000 protects your roof and building envelope from the elements during construction, while allowing any internal moisture to escape through the vapour permeable, non-porous TEEE layer.								
Features:								
Highly vapour perme	eable (Class 4)							
Long-term durability	and strength							
Weathertight & airti	ght weather resistive barrier (WRB)							
Helps protect buildir	ng from condensation							
Packaging:								
	is supplied in rolls 1.5 and 3 m wide e printed with the MENTO® 1000 na

Relevant Building Code clauses:

- B2 DURABILITY: Performance clauses B2.3.1 (a) not less than 50 years, B2.3.1 (b) 15 years and B2.3.2.
- E2 EXTERNAL MOISTURE: Performance clause E2.3.2.
- F2 HAZARDOUS BUILDING MATERIALS: Performance clause F2.3.1.

Statement on how the building product is expected to contribute to compliance:

- B2.3.1 (a), (b) and B2.3.2: SOLITEX® MENTO 1000 meets these requirements. Provided it is not exposed to the weather or ultra-violet light for a total of more than 30 days, and provided the exterior cladding is maintained in accordance with the cladding manufacturer's instructions and the cladding remains weather resistant, SOLITEX® MENTO 1000 is expected to have a serviceable life equal to that of the cladding.
- E2.3.2: When used as part of the ROOF cladding system, SOLITEX® MENTO 1000 will contribute to meeting this requirement. SOLITEX MENTO® 1000 must only be used under roof claddings that meet the requirements of the NZBC, such as those covered by NZBC Acceptable Solution E2/AS1, or roof claddings covered by a valid BRANZ Appraisal. When installed in accordance with the Technical Literature and BRANZ Appraisal, SOLITEX MENTO® 1000 will assist in the total cladding system's compliance with NZBC Clause E2.
- F2.3.1: SOLITEX® 1000 meets these requirements, and will not present a health hazard to people.
- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured
- physical properties of the building product
- how the building product is intended to be used.

Limitations on the use	e of the building product:
SOLITEX® MENTO 1000	must not be exposed to UV for more than 30 days.
¬ the scope limitations buildings or,	O has been appraised for use as a self-supporting roof underlay on buildings within the following scope: of NZBC Acceptable Solution E2/AS1, Paragraph 1.1 for timber-framed of NASH Building Envelope Solutions, Paragraph 1.1 for steel-framed
buildings; and,	
- with masonry tile roo	of cladding; and, rofiled metal roof cladding; and,
· ·	Wind Zones up to, and including, Extra High.
SOLITEX MENTO® 1000	has also been appraised for use in gable ends where an air barrier is required.
Design requirements t	that would support the appropriate use of the building product:
Timber and steel roof f manufacturer.	framing must be provided in accordance with the requirements of the NZBC and the roof cladding
Refer to the product BI	RANZ appraisal available from www.proclima.co.nz for more information
Installation requireme	ents (also provide link to the product installation guide):
Refer to the SOLITEX® I	MENTO Application Guide available from www.proclima.co.nz.

Maintenance requirements (also provide link to the product maintenance guide):						
There are no specific maintenar assembly and is inaccessible wh		ne product is covered or p	rotected by the subseque	nt layers of the building		
Is the building product/buildin Yes No	g product line subje	ect to warning or ban unc	der section 26 of the Buil	ding Act 2004?:
